

FOREFRONT-AT, LLC

CAPABILITY STATEMENT

Telecommunications & ICT Infrastructure Quality Assurance | RCDD-Led | TS/SCI Eligible

COMPANY OVERVIEW

Forefront-AT is a Service-Disabled Veteran-Owned Small Business specializing in quality assurance for telecommunications and ICT infrastructure on federal construction. We give USACE and its construction management partners a credentialed RCDD who verifies Division 27 work, from submittal to turnover, with 25+ years of Special Operations MILCON experience and current TS/SCI eligibility.

CORE COMPETENCIES

- **Telecom QA Inspection** — Division 27 and applicable Division 26 field inspection: cabling installation, terminations, labeling, pathways, telecom rooms, and bonding/grounding; review of copper and fiber test results; deficiency tracking and daily QA reports.
- **Telecom Submittal Review** — Division 27 product data, shop drawings, rack elevations, TR layouts, test plans, and as-builts, reviewed against UFGS, UFC 3-580-01, TIA, and BICSI; comment resolution in RMS.
- **ICT Design Review** — telecom drawings and specifications for standards compliance, constructability, and capacity, including outside plant and data center infrastructure.
- **Secure Facilities** — ICD 705 SCIF telecommunications and classified network cabling QA, from a TS/SCI-eligible RCDD.
- **Division 27 Specifications** — telecom specification development in SpecsIntact, installation design guides, and PWS/SOW development.

DIFFERENTIATORS

- **Independent QA:** we never supply products or installation to projects we inspect, so our reviews are free of conflicts.
- **Telecom specialists, not generalists:** RCDD-led QA from a designer who has written USACE Division 27 specifications.
- **Clearance-ready:** owner holds current TS/SCI eligibility, reinstatable by a cleared prime without a new investigation.
- **USACE systems-ready:** active RMS user; productive on day one.
- **Local presence:** based in West End, NC, near Fort Bragg and Camp Mackall.
- **SDVOSB:** eligible for SDVOSB set-aside and sole-source awards (FAR 19.14).

PAST PERFORMANCE

- **USACE Norfolk District — MILCON Project, Virginia | Jun 2026–present.** Telecommunications QA support to the USACE Resident Office.

KEY PERSONNEL — MICHAEL JUDGE, RCDD, PMP

- **Special Operations Campus, Fort Bragg, NC | 2006–2026 (L3 Communications; Arma Global/GDIT/Mayvin).** Sole RCDD and telecom project manager for a multi-facility SOF campus. Provided RCDD design guidance to A-E firms and Organizational Engineering on numerous MILCON and FSRM projects, including lead infrastructure design on a \$200M+ project; rewrote the campus USACE Division 27 specification in SpecsIntact; authored the campus telecom Installation Design Guide; SME for SCIF and telecom room construction to ICD 705; QA/QC on hundreds of projects before turnover.
